### The art of Bryan Pickens

[6 Oct 2010 | No Comment]

I get a good amount of e-mails daily about artists I may have not seen, and while I would love to show them all, not all of them are ready. Bryan Pickens was one of the artists I was recently introduced to that has a great style going and really needs to be seen more and more. Most of his work is acrylic on wood panel, and often is a blend of flat geometric patterns with some textural work in the background. Bryan also has a shop with a couple of giclee prints available. I look forward to seeing some new works from Bryan, and if you like his paintings as well head over to his site and bookmark it.
